Overturned Fuel Barge, San Francisco Bay, San Francisco County, Spill 17-2651

On 04/07/17 at 0048 hours, the California State Warning Center (CSWC) received notification via a National Response Center Report (United States Coast Guard – USCG) that a Fuel Barge capsized due to rough weather and is now partially submerged in the San Francisco Bay 1/2 mile off Yerba Buena Island.

- The report advises that there is a potential for the release of 4000 gallons of diesel fuel and 300 gallons of hydraulic fluid.
- The CSWC made notifications according the Hazmat SOP. All Cal OES Duty Officers were notified.

At 0128 hours the United States Coast Guard (USCG) advised:

- The barge is located approximately 1/2 miles west of Yerba Buena Island.

At 0151 hours, Cal OES Ports and Harbors advised:

- Per the USCG Commander in San Francisco, they are sending a 45 foot motored life boat to asses the situation.
- The barge is located in 20 feet of water.
- The Cal OES Coastal Duty Officer (CDO) has had no requests from Alameda County.
- Cal OES Ports and Harbors will continue to monitor and update information received from the USCG.

WEATHER OF CONCERN

Weather of Concern

- A strong spring storm system will bring rain, high elevation snow and strong gusty winds today over portions of California.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

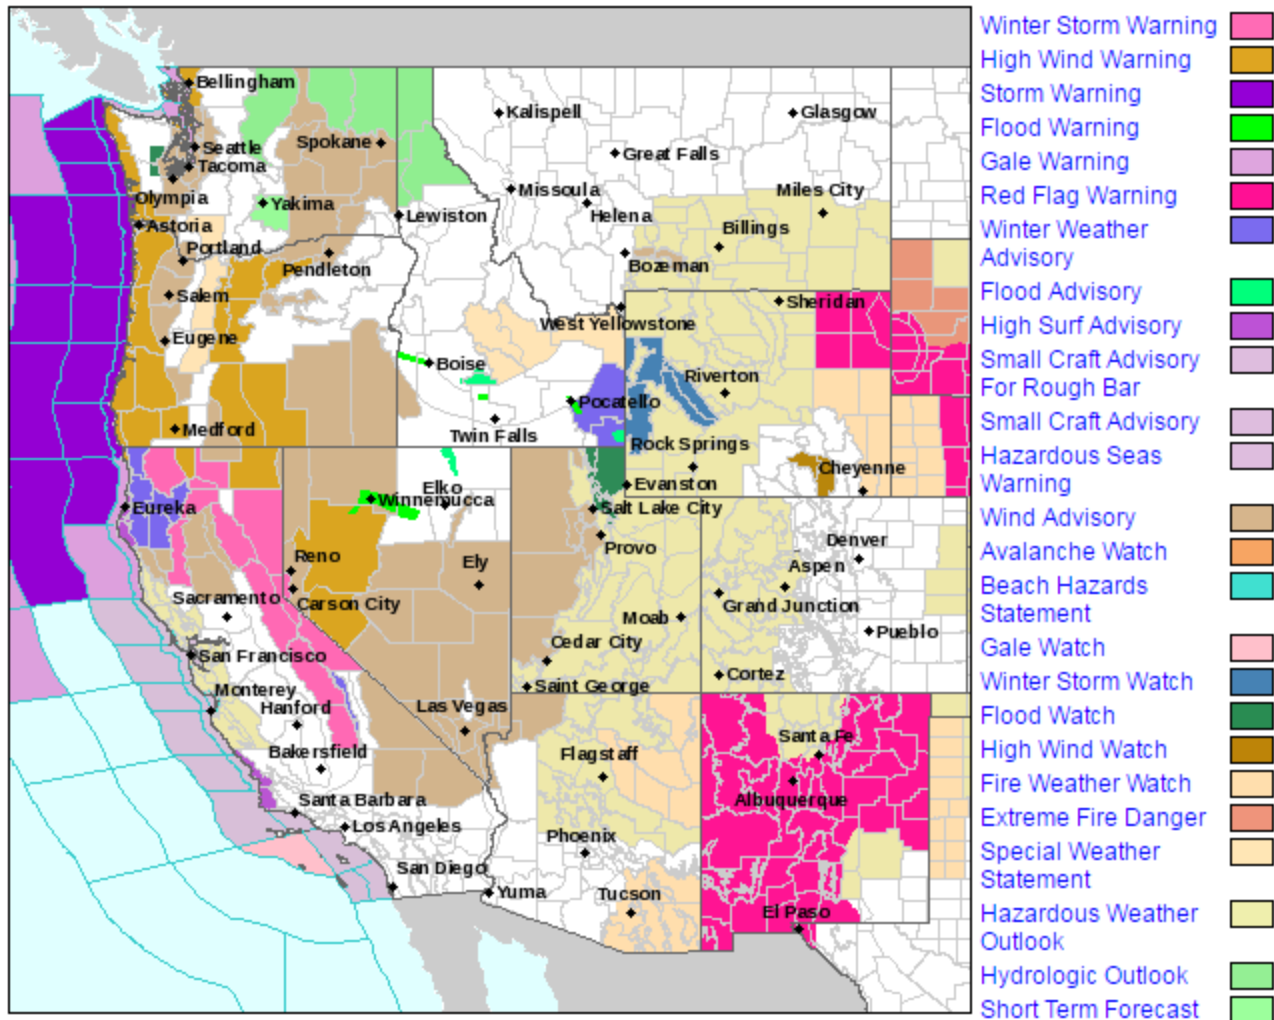

NORTHERN CALIFORNIA

Wet, very windy weather is expected through Saturday, mountain travelers should expect snow. Expect unsettled, wet weather to continue next week. Precipitation will hit all areas of the region through Saturday, and strong southerly winds will decrease some early today. Precipitation will become rather heavy at times into early today as well. Snow levels will be relatively high today at around 5000 ft in the north and 7000 ft in the south, but will probably lower somewhat tonight for a while. Precipitation will continue today through Saturday, but also decrease and become showery Saturday afternoon. Snow levels will lower later Friday to around 3500-4000 ft in the north and 6000-6500 ft in the south and may become about 500 ft lower Saturday. Moderately strong, gusty winds will continue into Saturday as well, but they will be lighter than tonight's. Sunday is expected to be a dry day with fairly light winds. Another set of wet weather systems will move through the region next week without a lot of break between periods of precipitation. More strong winds and fairly low snow levels are probable late next week.

SOUTHERN CALIFORNIA

A Pacific storm will approach and move inland over California bringing a cooling trend and an increase in humidity through Saturday. Temperatures will be cooler by 5 and 10 degrees today but will be below normal by Saturday. Minimum humidity will increase to over 40% away from the deserts tomorrow. The storm will bring showers to the region starting Friday evening. Most of Central California will receive between 1 and 4 inches of rainfall and most of Southern California will receive less than a half inch of rainfall before showers end Saturday afternoon. The snow level will initially start at around 8,000 feet and end at around 5,000 in the north and 7,000 feet in the south. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes through Saturday evening. A weak ridge of high pressure will bring a little warmer temperatures Sunday, but temperatures will still be a little below normal. Zonal flow will bring near normal temperatures to the area Monday through the middle of next week.
